SMA Strategic 50 Quarterly Report

As of 30/06/2017

Second quarter 2017

Market update

Political uncertainty was a major theme across global markets this quarter, with both good and bad outcomes. Emmanuel Macron's victory in the French elections and Angela Merkel's Christian Democratic Party's strong performance in local elections have helped ease concerns over a seemingly populist anti-globalisation movement in Europe.

British equities and the Sterling initially responded well to Theresa May's call for a snap election in May to strengthen the nation's position in Brexit negotiations. However, this momentum dissipated when the election produced a hung parliament and May's Brexit plan still lacked detail at quarter end.

North Korea's nuclear missile program is also stirring the pot but it is not expected to affect equity markets as long as the US and China continue to cooperate on the matter.

China is increasingly conscious of its financial fragility caused by high levels of corporate debt, the complex nature of its wealth management products, and links to the shadow banking system. To overcome this, the central bank and three regulators (banking, securities and insurance) have joined forces to address the complex and opaque shadow banking sector, and introduced aggressive restrictions on permissible financial activities. This is the right move in the long run to defuse overleveraging and systemic financial risk in China's economy, although we are watching closely for short term negative repercussions.

Model update

Although financial markets were a little weak in the month of June, performance has been strong for the past 12 months.

The Colonial Infrastructure and MFS International Shares funds were the standout performers within your portfolio earning 4.9% and 6.6% respectively over the quarter.

Within Australian shares, Schroders earned 22.1% for your portfolio over the year, although due to changing economic conditions and a weaker iron ore price, it has only contributed 0.58% over the recent quarter. As we do not expect these conditions to improve, your portfolio remains underweight in Australian shares.

We have introduced a new manager into the portfolio, the CFML Antipodes Global Fund. The Fund is managed by Antipodes Global Investment Partners, a Sydney based boutique investment firm that seeks both to achieve good investment returns and to build portfolios with a capital preservation focus. Antipodes replaces both the Platinum International and Magellan Global funds within the model.

Justin McLaughlin
Chief Investment Officer

SMA Strategic 50

As of 30/06/2017

Portfolio objective

The SMA Strategic 50 model is a portfolio of actively managed assets designed to achieve moderate returns over the medium term.

Performance[^]

	Since inception (%p.a.)**	2 years (%p.a.)	1 year (%)	6 months (%)	3 months (%)	1 month (%)
Total Return	7.2		8.8	4.6	2.3	-1.1
Volatility	4.2		3.9	1.2		

**Inception Date: 30/09/2015

Growth of \$100 invested at inception [^]

Time Period: 1/10/2015 to 30/06/2017

[^] Performance data is after fund manager fees, but before any other applicable fees or taxes and assumes the reinvestment of dividends. Past performance is not indicative of future performance. Due to the flexibility of rebalancing and variations between accounts, performance shown is indicative only and assumes rebalancing occurs at the end of each calendar month, and also assumes that there are no deposits, withdrawals nor exceptions to regular rebalancing in the model portfolio.

Return and risk vs. peer group

Time Period: 1/07/2016 to 30/06/2017

Peer Group (5-95%): Open End Funds - Australia - Multisector Balanced

What is a risk and return chart?

The chart to the left shows the returns and associated risk of the model portfolio (darker shape) against its peers (light grey circles), over the past year.

The past years return (as a percentage) is shown on the vertical axis.

The risk (as measured by the standard deviation) of the investment over the past year is shown on the horizontal axis.
